Make Money With AdSense - Download The Slick Wordpress Theme and Crusher Guide

Happy customer says: "Had my first \$10+ day from AdSense after using your theme on a handful of sites..."

My name is Gabriel and I'm not one of the IM gurus that promise you overnight riches. What I can do for you though, is let you have a peek at my AdSense blueprint generating almost 5 figures a month now.

What's really amazing is that no special tricks are involved, just simple Wordpress blogs and AdSense ads that anyone has access to.

The techniques you're about to discover are all white hat, no dirty tricks involved, although making money this easy should be immoral.

I've decided to post a video where clumsy ol' me is logging in into my AdSense account and show you around:

Video requires Adobe Flash Player to be installed. If you are you using a browser with JavaScript disabled please enable it now. If the video does not load please update your version of the free Flash Player by downloading [here](#).

Notice in the video, my currency is euro, 272 euro represents \$334 according to my currency conversion tools.

The reason I posted the video above is to show you I am one of those guys who take action rather than talk about making money.

I can't promise you the same results as you've seen above (especially if you're not willing to put the work and don't have the patience to collect the results).

The AdSense Crusher System will cut a lot of corners for you but it still takes sweat and hard work to get things done just like anything else worth waiting for in life.

Dave D, a previous customer who bought and followed my blueprint had tremendous success using it and he was gracious enough to post a screenshot of his amazing jump in clickthrough (and earnings...)
